

Says

What have we heard them say?
What can we imagine them saying?

some of us have an auditory processing disorder, which means that although we "heard " the person our processing deficits kept us from immediately understanding what was said.

Other people may unconsciously ask "what ?" as a way to garner a little extra time to respond.

The sometimes it is simply a delay in processing.

This analysis canhelp uber driver efforts for maximum efficiency and profitability.

uber's data can be analyzed on a daily,weekly,monthly basis to understand the trends and patterns of trip volums.

Does

What behavior have we observed?
What can we imagine them doing?

Thinks

What are their wants, needs, hopes, and dreams?
What other thoughts might influence their behavior?

It was founded in 2009 by garrett camp and trapis kalanick and is pased in san francisco, california.

Uper porvides a convenient way for individuals to ruquest rides from drivers who use there own personal vehicles.

The research is carried out on uper drives data collected from the year 2016 .

Uber driver analysis arfers to the analzing the number of trips taken by uper delbrs can provide insides in to the overall actipity and the demand for rids specific areas .

this can be rips can be anlyzed based on geographic regions or specific sites to identifi areas with figher demand

this analysis can help uper drivers tecided wher to focus their driving a fours for maximum efficiency and profitability.

before you start collection and analyzing data,you need to have a clear and specific research question and objectives.

Feels

What are their fears, frustrations, and anxieties?
What other feelings might influence their behavior?
